Issued this 9th day of August 1944.

ASHLEY SELLERS,
Assistant War Food Administrator.

War Food Administration,
Summary to WFO 80 and 80-1.

Estimating a total grape production of 164,800 tons in five major Concord grape producing areas this year as compared with 129,800 tons produced in 1943, the War Food Administration today announced the termination of War Food Order 80, as amended, which restricted the sale of Concord-type grapes for fresh consumption in those areas and required processors to set aside all processed Concord grapes for allocation.

This action, effective August 11, also terminates War Food Order 80-1, which was issued by WFA's Director of Distribution pursuant to WFO 80, as amended. WFO 80-1 provided the allocation of processed Concord grapes which were set aside under WFO 80, as amended.

WFO 80, as amended, restricted the sale of Concord-type grapes for fresh consumption in the five heavy producing areas to assure the availability of supplies of processed grapes for the manufacture of increased quantities of jams, jellies, and fruit butters. The restricted

areas were designated counties in New York, Pennsylvania, Ohio, Michigan, and Washington.

WFA officials stated that the Order has effectively accomplished the purpose for which it was issued in that adequate supplies of processed Concord grapes were made available from the 1943 crop for the desired production of jam, jelly, and fruit butter, and, in view of the indicated increased production of Concord-type grapes this year, the provisions of the Order are no longer necessary.
